Full-Stack Developer with 4+ years of experience crafting scalable web applications using React, Next.js, and Laravel. I specialize in turning complex problems into clean, efficient solutions from database architecture to pixel-perfect UI. Passionate about writing maintainable code and delivering real business value.

RELEVANT WORK EXPERIENCE

UI-Lib, Subizbazar, Sylhet

2021 – Ongoing

Jr. Full-Stack Developer (June 2023 – Present)

- Built and deployed full-stack applications and RESTful APIs with Laravel and MySQL, including Mentor LMS, a production learning-management platform.
- Designed normalized database schemas with data validation and error handling, reducing data-integrity issues across production applications.
- Developed reusable front-end components integrating React, Inertia.js, and Laravel APIs, shared across multiple projects to cut feature development time.
- Collaborated with cross-functional teams and performed regular code reviews to deliver secure, maintainable releases.

Front-end Developer (July 2021 - June 2023)

- Built responsive, user-friendly interfaces with React, Tailwind CSS, and Material-UI for commercial dashboard and e-commerce templates, including Bazar Pro, sold on the official Material-UI store.
- Improved page performance and interactivity by optimizing state management and following React architecture best practices.
- Translated complex UI/UX designs into scalable, pixel-accurate interfaces in close collaboration with designers.
